Jano

226 Arcilla

Ref. 21585

An elegant Ottoman fabric with a mini-diamond design and a light sheen that surprises not only for its elegance, but also because of its acoustic insulation and flame-retardant properties. Jann is a welcoming fabric aesthetically, but also acoustically (aw = 0.6), a semi-heavy material that comes in a 300 cm width, making it ideal for projects in domestic, professional, and contract settings. This multi-purpose, decorative fabric can be used to upholster sofas, chairs, and walls, as well as for making draperies, bedspreads, and throw pillows. As a curtain fabric, Jano protects the space from light without totally blocking it out. Available in 31 colors, Jano coordinates perfectly with the Ceres and Dedalo fabrics from the same line.

Composition

51% Trevira - 49% Pol.
