## Jano

### 331 Añil

Ref. 21590

An elegant Ottoman fabric with a mini-diamond design and a light sheen that surprises not only for its elegance, but also because of its acoustic insulation and flame-retardant properties. Jano is a welcoming fabric aesthetically, but also acoustically ( $aw = 0.6$ ), a semi-heavy material that comes in a 300 cm width, making it ideal for projects in domestic, professional, and contract settings. This multi-purpose, decorative fabric can be used to upholster sofas, chairs, and walls, as well as for making draperies, bedspreads, and throw pillows. As a curtain fabric, Jano protects the space from light without totally blocking it out. Available in 31 colors, Jano coordinates perfectly with the Ceres and Dedalo fabrics from the same line.
