DOUBLE-SIDED FABRIC!

With its soft colors and textures, Maiz seduces the eye up close with a stylized taper; at a distance it reads as a false solid. Like corn and its leaves. It's a question of how you look at it, from what angle you look at it, and how much you let yourself get carried away by the nature that flows through Maiz's threads.

Twelve colors ? or twenty-four, depending on how you look at these new fabrics by Equipo DRT. This double-sided upholstery fabric in 140 cm width is suitable for both indoor and outdoor spaces. Treated with Teflon, these fabrics are resistant to sunlight, water and oil repellent, machine washable and mould resistant. Allow yourself to be inspired by nature. Just picture it.

Meters by roll : 0
